

FISHING BOATS

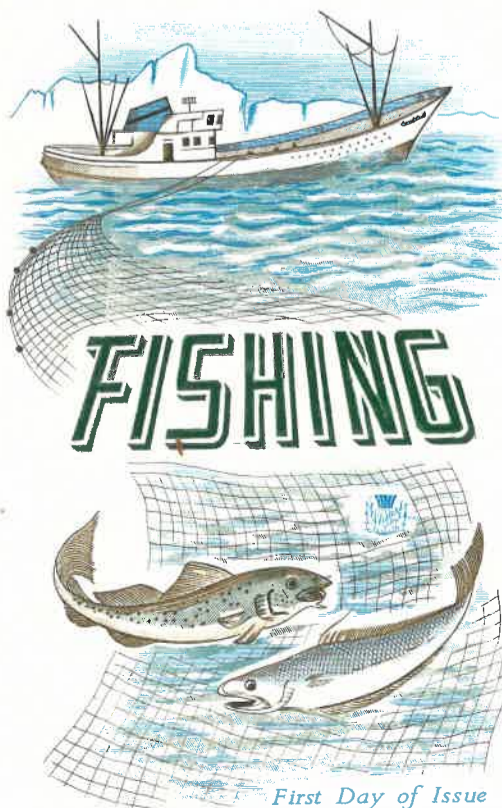

Fishing Boats

Fishing boats were usually built out of wood in the past, it is not often used anymore because of higher maintenance costs and bad durability. In modern times, fiber glass is used for boats less than 25 meters and steel is used for boats larger than 25 meters.

What is fishing?

Fishing is a prehistoric practice that was around for at least 70,000 years ago. Since the 16th century vessels have been designed to cross Oceans in pursuit of fish. Ever since the 19th century, it has evolved into larger vessels that in some cases process fish on board.
