

1943 - STREPTOMYCIN – SELMAN ABRAHAM WAKSMAN

SELMAN ABRAHAM WAKSMAN

RUSSIAN – AMERICAN INVENTOR
(1888-1973)

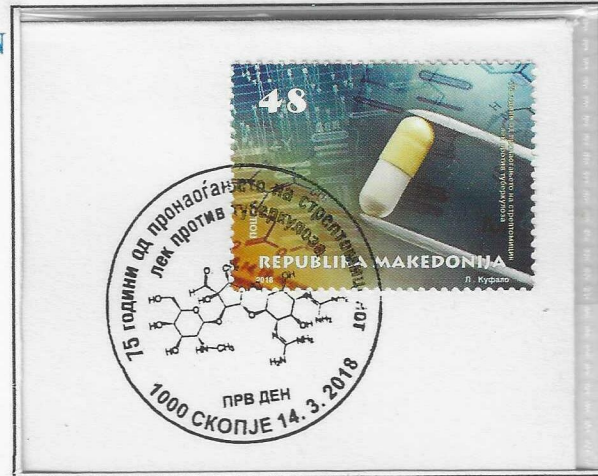

Biochemist and Microbiologist
Discoverer of **STREPTOMYCIN**
and other Antibiotics like Neomycin.

In **1952 WON A NOBEL PRIZE IN MEDICINE.**

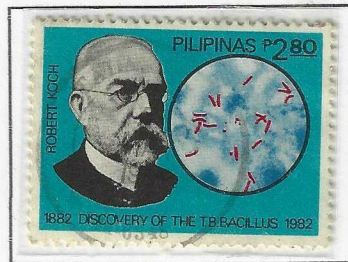

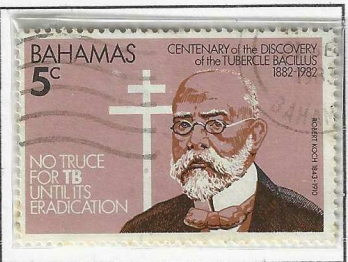

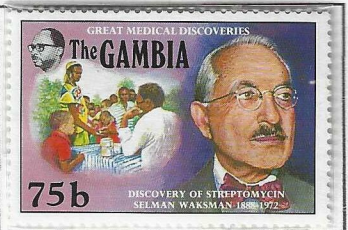

STREPTOMYCIN is used to treat
TUBERCULOSIS

Streptomycin was one of the first aminoglycoside drugs to be discovered. In 1943, A. I. Schatz, a graduate student in the Rutgers University lab of antibiotic pioneer S. A. Waksman, isolated it from the soil actinobacterium *Streptomyces griseus*.
